I've been working with software for a while now, making progress in the web field. My goal is to learn new languages and technologies/frameworks, and to be able to constantly work on projects and create things with what I learn. I work as hard as I can to improve my CV and my skills, and I take advantage of every opportunity. In addition, I'm interested in researching Technology and Artificial Intelligence, PC and Mobile operating system technologies. I believe I can improve myself to the fullest extent with new languages and new versions.
